SUMMARY

Full-stack developer with hands-on experience building real-world PERN applications, including a production task management system built during a hybrid internship at Asterdio Inc. and a healthcare platform with a machine-learning symptom classifier. Recently completed a Bachelor in Computer Applications (awaiting final results) and open to full-time roles, remote or onsite.

TECHNICAL SKILLS

- Front-end: React.js, React Router, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Vite
- Back-end: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture, PHP
- Databases: PostgreSQL, MySQL, Prisma ORM, Drizzle ORM
- AI / ML: Naive Bayes Classification, Weighted Ranking Algorithms
- Tools & Technologies: Git, GitHub, Docker, Postman, VS Code
- Testing & QA: Manual Testing, Automated Testing (Playwright), API Testing (Postman)
- Practices: Agile, Code Reviews, Responsive Design, Wireframing

EDUCATION

National School of Computer Studies

Bachelor in Computer Applications (Completed, awaiting final results)

Paknajol, Kathmandu

2021 – 2026

National Institution of Science and Technology

+2 Business Management

Lainchaur, Kathmandu

2018 – 2020

EXPERIENCE

Software Development Intern at Asterdio Inc.

Hybrid | 19 July 2025 – 19 September 2025

UN Park Lane, Sankhamul

- Developed a Task Management System using the PERN stack (PostgreSQL, Express.js, React, Node.js).
- Implemented role-based access, user authentication (JWT), and secure task CRUD operations.
- Built modular REST API endpoints for task creation, assignment, progress tracking, and user accounts.
- Designed responsive UI components and optimized performance using efficient state management in React.
- Integrated PostgreSQL models and managed database schema for user/task relations.
- Collaborated in an Agile development environment, using Git, code reviews, and daily stand-ups.

PROJECTS

Medimatch - Doctor Appointment and Recommendation System

- Built a full-stack healthcare platform using TypeScript, React, Express, PostgreSQL, Drizzle ORM, and Docker.
- Implemented a Bernoulli Naive Bayes symptom classifier with 97.6% accuracy across 41 diseases.
- Ranked doctors with a six-factor weighted scoring algorithm; covered by 40 automated tests.

Taskly - Kanban Task Management App

- Independently rebuilt my internship project using React 19, Vite, TypeScript, Express 5, PostgreSQL, and Prisma.
- Designed a six-stage Kanban workflow with role-based permissions for admins and members.
- Implemented task filtering, a complete activity audit trail, JWT authentication, and Zod request validation.

Fresh Mart - Online Grocery Store

- Built a grocery e-commerce site (PHP, MySQL) with product search, cart, admin panel, and inventory tracking.

QA Automation: Created automated functional and regression tests with Playwright across major user flows.
